ADIYA KOBLANDY

Tokyo, Japan | 070 8549 5026 | koblanndy@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Data Engineer working across machine learning, data pipelines and cloud infrastructure. Builds production ML pipelines and REST APIs in Python, applied NLP for Japanese-language data, graph and SQL data systems, and AWS infrastructure defined as code with AWS CDK.

EXPERIENCE

Junior Data Engineer, Compliance Data Lab *April 2025 - Present*

-Developing a production-grade ML pipeline and REST API for Japanese text normalization, covering preprocessing, model training, validation and persistence in a modular architecture; reached 97% benchmark accuracy and is planned for commercial deployment.
-Designed and built a Katakana address module in the core package of an identity resolution system, serving as a geocoding fallback for Katakana-format addresses. Owned it end to end: ideation, cleaning pipeline, standardization logic, and unit tests written test-first with pytest.
-Moving the team's AWS infrastructure to infrastructure as code by defining Lambda, S3, ECS, Step Functions as AWS CDK stacks in Python, making environments reproducible and deployments repeatable.
-Built Python data pipelines covering preprocessing, model inference and deployment on AWS.
-Containerized pipeline components with Docker for reproducible deployments across the team.
-Queried and integrated Neo4j graph databases (Cypher) alongside SQL systems for entity validation and compliance data matching.
-Work in a data engineering team of 4 within a cross-functional team of ~10 (frontend, backend, QA), reporting to the Data Science & Analytics Leader, taking on increasingly independent ownership.

EDUCATION

Tokyo International University (東京国際大学) | Faculty of Economics Toshima, Japan
Bachelor of Science | *Major Digital Business & Innovations* | *GPA: 3.6/4.0* *2022 – 2026*
Coursework: Informatics & Computing, Computer Networking, Python for Data Science & AI, Statistics I & II, Mining Unstructured Data, Database and Big Data, Digital Banking and Fintech.

Radboud University (Radboud Universiteit) | Faculty of Science Nijmegen, Netherlands
Bachelor of Science | *Major Computing Science* | *Exchange Semester* *Spring Semester 2024*
Coursework: Introduction to R, Calculus and Probability Theory, Artificial Intelligence.

SKILLS

Languages: Python, SQL, Cypher, R
Cloud & Infrastructure: AWS S3, Lambda, EC2, SSM, CDK, Infrastructure as Code, Docker, Linux
Data & Databases: PostgreSQL, Neo4j, data pipelines, data cleaning and standardization
ML & NLP: text normalization, applied NLP for Japanese, model training and evaluation, EDA
Engineering practices: REST APIs, Git, pytest and TDD, Agile

CERTIFICATIONS

AWS Cloud Technical Essentials | Nov 2026

LEADERSHIP EXPERIENCE

Founder, Tokyo Student Network *September 2025 – Present*

-Founded a student-led nonprofit connecting students across Tokyo universities; grew to 40+ active members, organized 5 events with 120+ total attendees

Student Representative, Women in Science Japan *June 2024 – November 2025*

- Coordinated 12 volunteers across 3 annual flagship events managing logistics and guest registration

Speakers' Committee Leader, TEDxTIU, Tokyo International University *September 2022 – January 2024*

-Led 8-person team across 4 events with 250+ attendees; served as Master of Ceremonies

ADDITIONAL

Languages: Kazakh – Native, Russian – Native, English – Fluent (C1), Japanese – Conversational (N3)
